

COBBLESTONE BLOCKS

A simpler way to achieve a rustic cobbled pathway, driveway or other pedestrian walkway. Heavily textured surface and solid body color reinforces the authentic natural split stone appearance.

Benefits of Archatrak cobblestone blocks include:

- A traditional cobblestone look but perfectly uniform dimensions
- Rich, deep, through-body coloring
- Precise size and thickness for safe pedestrian use
- Frost, salt and stain resistant

SIZE & COLOR OPTIONS

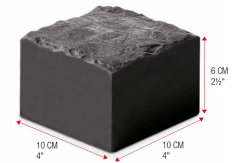

Three basic color options to blend with existing landscapes. Subtle color variation between individual blocks of named colors ensures natural appearance.

SIZE

Block size: 4" x 4" x 2 $\frac{1}{2}$ " H

Packing: 768 pcs/pallet (8 rows of 96 pcs) ; 83 sq.ft./pallet

INSTALLATION

A concrete aggregate base with mesh reinforcing is required for any vehicular applications. The blocks can then be either dry laid on a bed of sand or gravel spread over the concrete base and joints filled with polymeric sand, or for maximum stability over time, laid on a bed of cement mixed with sand and joints filled with either polymeric sand or cement grout.
